28 “[a] list of exhibits that each party intends to present at the Evidentiary Hearing” that

Case Center his exhibits that that itself fulfills the requirement to submit a list of exhibits to this Court.

Plaintiff is willing to correct any errors that he has made in attempting to present to this Court the 15 exhibits, to be used at the 9 March 2026. The Plaintiff requests that this filing be construed, as justice requires, as a motion for leave to correct errors and motion for extension of time for excusable neglect, considering that Case Center is a new technology that Plaintiff is unfamiliar with. Technical difficulties have contributed to delays in transmitting these files into Case Center earlier.
